

Quick Install / Setup with DRV-Z1

- Make sure the **Firmware** on DRV-Z1 is v15.04 or higher
- **Uninstall** all previous versions of Dimension Two software (if any)
- Insert the **D2 dongle** into a USB port on PC, 'Device driver software installed Successfully' message will be displayed if they were missing.
- **Install** Dimension Two software by clicking "**D2v1.20.00Setup.exe**"
 - Follow On Screen Instructions – When finished **Reboot PC**

- **Connect** DRV-Z1 Head output (HDMI Out - L or R) to a Capture card (internal or external) via a HDMI cable. **Connect** capture card to a PC via USB3 cable
 - Turn ON DRV-Z1
- Insert the **D2 Dongle** and then open the D2 software
- Click on the **D²** icon in the top right of the screen, go to **Settings**, and then **Video**
 - Select Image Source as "**DirectShow**"
 - Click **Done x 2 and Close** the Software
- Dimension Two is now installed and **ready for use**.
